		(Revelations 13:18; This passage suggests the he that has understanding, in other words one who gains insight into the nature of self in the image of true Understanding (Binah) should be able to understand the structure of man, and in this true Wisdom (Chockmah). The New English Qabalah is structured with ten spheres and 26 paths. Traditionally, there were 22 paths, and along these ten spheres were called the Thirty Two Paths of Widsom. The summation of the 32 paths was one of many mathematical formulas used by Hebrew Rabbis for centuries. The English Qabalah therefore has thirty six paths of wisdom. When you apply this forumula to The New English Qabalah, the summation of the number 36 (1+2+3+4...+36) is the number 666. This suggests that the very structure of the New English Qabalah reresents the final and complete structure of man desccribed in Revelations in the Bible. from "Dyothelemic Christianity: Etterian English Qabalah" by Christopher Etter)

		(Heru-ra-ha; Horus is one of the oldest and most significant deities in ancient Egyptian religion, who was worshipped from at least the late Predynastic period through to Greco-Roman times. Different forms of Horus are recorded in history and these are treated as distinct gods by Egypt specialists. These various forms may possibly be different perceptions of the same multi-layered deity in which certain attributes or syncretic relationships are emphasized, not necessarily in opposition but complementary to one another, consistent with how the Ancient Egyptians viewed the multiple facets of reality. He was most often depicted as a falcon, most likely a lanner or peregrine, or as a man with a falcon head

		(Yodh also spelled Yud, Yod, Jod, or Jodh is the tenth letter of many Semitic alphabets, including Phoenician, Aramaic, Hebrew Yud and Arabic Ya (in abjadi order, 28th in modern order). Its sound value is /j/ in all languages for which it is used; in many languages, it also serves as a long vowel, representing /i:/. The Phoenician letter gave rise to the Greek Iota (Ι), Latin I, J, Cyrillic I. As Yud is the smallest letter, much kabbalistic and mystical significance is attached to it. According to the Gospel of Matthew Jesus mentioned it during the Antithesis of the Law when he says: "One jot or one tittle shall in no wise pass from the law, till all be fulfilled." Jot, or iota, refers to the letter Yud; it was often overlooked by scribes because of its size and position as a mater lectionis. In modern Hebrew, the phrase "tip of the Yud" refers to a small and insignificant thing, and someone who "worries about the tip of a Yud" is someone who is picky and meticulous about small details. Much kabbalistic and mystical significance is also attached to it because of its gematria value as ten, which is an important number in Judaism, and its place in the name of God)

		(The Hebrew term Abaddon, and its Greek equivalent Apollyon, appear in the Bible as both a place of destruction and an angel. In the Hebrew Bible, abaddon is used with reference to a bottomless pit, often appearing alongside the place (sheol), meaning the realm of the dead. In the New Testament Book of Revelation, an angel called Abaddon is described as the king of an army of locusts; his name is first transcribed in Greek (Revelation 9:11 "whose name in Hebrew is Abaddon"), and then translated "which in Greek means the Destroyer")

Xeper	2	(Khepri was connected with the scarab beetle (kheper), because the scarab rolls balls of dung across the ground, an act that the Egyptians saw as a symbol of the forces that move the sun across the sky. Khepri was thus a solar deity. Young dung beetles, having been laid as eggs within the dung ball, emerge from it fully formed. Therefore, Khepri also represented creation and rebirth, and he was specifically connected with the rising sun and the mythical creation of the world. The Egyptians connected his name with the Egyptian language verb kheper, meaning "develop" or "come into being". Kheper, or (Xeper) is a transcription of an ancient Egyptian word meaning to come into being, to change, to occur, to happen, to exist, to bring about, to create, etc. Egyptologists typically transliterate the word as pronounced. Both Kheper and Xeper possess the same phonetic value and are pronounced as: kheffer)

The Zohar contains a discussion of the nature of God, the origin and structure of the universe, the nature of souls, redemption, the relationship of Ego to Darkness and "true self" to "The Light of God", and the relationship between the "universal energy" and man. Its scriptural exegesis can be considered an esoteric form of the Rabbinic literature known as Midrash, which elaborates on the Torah)

Aeolus	11	(In Greek mythology, the ruler of the winds. A name shared by three mythical characters. These three personages are often difficult to tell apart, and even the ancient mythographers appear to have been perplexed about which Aeolus was which. Diodorus Siculus made an attempt to define each of these three (although it is clear that he also became muddled), and his opinion is followed here. Briefly, the first Aeolus was a son of Hellen and eponymous founder of the Aeolian race; the second was a son of Poseidon, who led a colony to islands in the Tyrrhenian Sea; and the third Aeolus was a son of Hippotes who is mentioned in Odyssey and the Aeneid as the Keeper of the Winds. All three men named Aeolus appear to be connected genealogically, although the precise relationship, especially regarding the second and third Aeolus, is often ambiguous)

		(In Norse mythology ("ladies", singular: dis) a ghost, spirit or deity associated with fate who can be both benevolent and antagonistic towards mortal people. Disir may act as protective spirits of Norse clans. Their original function was possibly that of fertility goddesses who were the object of both private and official worship called disablot, and their veneration may derive from the worship of the spirits of the dead. The dísir, like the valkyries, norms, and vaettir, are almost always referred to collectively. The North Germanic disir and West Germanic Idisi are believed by some scholars to be related due to linguistic and mythological similarities, but the direct evidence of Anglo-Saxon and Continental German mythology is limited. The disir play roles in Norse texts that resemble those of fylgjur, valkyries, and norms, so that some have suggested disir is a broad term including the other beings)

		<p>(The Quran literally meaning "the recitation"; also romanized Qur'an or Koran) is the central religious text of Islam, which Muslims believe to be a revelation from God (Arabic: Allah). It is widely regarded as the finest piece of literature in the Arabic language. Quranic chapters are called suras and verses, ayahs. Muslims believe the Quran was verbally revealed by God to Muhammad through the angel Gabriel (Jibril), gradually over a period of approximately 23 years, beginning on 22 December 609 CE, when Muhammad was 40, and concluding in 632, the year of his death. Muslims regard the Quran as the most important miracle of Muhammad, a proof of his prophethood, and the culmination of a series of divine messages that started with the messages revealed to Adam and ended with Muhammad. The word "Quran" occurs some 70 times in the text of the Quran, although different names and words are also said to be references to the Quran. According to the traditional narrative, several companions of Muhammad served as scribes and were responsible for writing down the revelations. Shortly after Muhammad's death, the Quran was compiled by his companions who wrote down and memorized parts of it. These codices had differences that motivated the Caliph Uthman to establish a standard version now known as Uthman's codex, which is generally considered the archetype of the Quran known today. There are, however, variant readings, with mostly minor differences in meaning)</p>

He has the hindquarters, legs, and horns of a goat, in the same manner as a faun or satyr. With his homeland in rustic Arcadia, he is also recognized as the god of fields, groves, and wooded glens; because of this, Pan is connected to fertility and the season of spring. Shiva is also regarded as the patron god of yoga and arts. The main iconographical attributes of Shiva are the third eye on his forehead, the snake Vasuki around his neck, the adorning crescent moon, the holy river Ganga flowing from his matted hair, the trishula as his weapon and the damaru as his musical instrument. Ajax	20	<p>(a mythological Greek hero, the son of King Telamon and Periboea, and the half-brother of Teucer. He plays an important role, and is portrayed as a towering figure and a warrior of great courage in Homer's Iliad and in the Epic Cycle, a series of epic poems about the Trojan War. He is also referred to as "Telamonian Ajax," "Greater Ajax," or "Ajax the Great", which distinguishes him from Ajax, son of Oileus: Ajax the Lesser. In Etruscan mythology, he is known as Aivas Tlamunus. Ajax is the son of Telamon, who was the son of Aeacus and grandson of Zeus, and his first wife Periboea. He is the cousin of Achilles, and is the elder half-brother of Teucer. Many illustrious Athenians, including Cimon, Miltiades, Alcibiades and the historian Thucydides, traced their descent from Ajax. The Italian scholar Maggiani recently showed that on an Etruscan tomb dedicated to Racvi Satlnei in Bologna (5th century BC) there is a writing that says: "aivastelmunsi" = "family of Ajax Telamon")</p>

		<p>(Edward Alexander Crowley; born 12 October 1875 died 1 December 1947 was an English occultist, ceremonial magician, poet, painter, novelist, and mountaineer. He founded the religion and philosophy of Thelema, identifying himself as the prophet entrusted with guiding humanity into the Æon of Horus in the early 20th century. Born to a wealthy Plymouth Brethren family in Royal Leamington Spa, Warwickshire, Crowley rejected this fundamentalist Christian faith to pursue an interest in Western esotericism. He was educated at the University of Cambridge, where he focused his attentions on mountaineering and poetry, resulting in several publications. Some biographers allege that here he was recruited into a British intelligence agency, further suggesting that he remained a spy throughout his life. In 1898 he joined the esoteric Hermetic Order of the Golden Dawn, where he was trained in ceremonial magic by Samuel Liddell MacGregor Mathers and Allan Bennett. Moving to Boleskine House by Loch Ness in Scotland, he went mountaineering in Mexico with Oscar Eckenstein, before studying Hindu and Buddhist practices in India. He married Rose Edith Kelly and in 1904 they honeymooned in Cairo, Egypt, where Crowley claimed to have been contacted by a supernatural entity named Aiwass, who provided him with The Book of the Law, a sacred text that served as the basis for Thelema. Announcing the start of the Æon of Horus, The Book declared that its followers should adhere to the code of "Do what thou wilt" and seek to align themselves with their Will through the practice of magick. After an unsuccessful attempt to climb Kanchenjunga and a visit to India and China, Crowley returned to Britain, where he attracted attention as a prolific author of poetry, novels, and occult literature. In 1907, he and George Cecil Jones co-founded a Thelemite order, the A.'.A.'. , through which they propagated the religion. After spending time in Algeria, in 1912 he was initiated into another esoteric order, the German-based Ordo Templi Orientis (O.T.O.), rising to become the leader of its British branch, which he reformulated in accordance with his Thelemite beliefs. Through the O.T.O., Thelemite groups were established in Britain, Australia, and North America. Crowley spent the First World War in the United States, where he took up painting and campaigned for the German war effort against Britain, later revealing that he had infiltrated the pro-German movement to assist the British intelligence services. In 1920 he established the Abbey of Thelema, a religious commune in Cefalù, Sicily where he lived with various followers. His libertine lifestyle led to denunciations in the British press, and the Italian government evicted him in 1923. He divided the following two decades between France, Germany, and England, and continued to promote Thelema until his death. Crowley gained widespread notoriety during his lifetime, being a recreational drug experimenter, bisexual and an individualist social critic. He was denounced in the popular press as "the wickedest man in the world" and a Satanist. Crowley has remained a highly influential figure over Western esotericism and the counter-culture, and continues to be considered a prophet in Thelema. In 2002, a BBC poll ranked him as the seventy-third greatest Briton of all time)</p>

Amish	20	(Pennsylvania Dutch: Amisch, German: Amische) are a group of traditionalist Christian church fellowships with Swiss Anabaptist origins. They are closely related to, but distinct from, Mennonite churches. The Amish are known for simple living, plain dress, and reluctance to adopt many conveniences of modern technology. The history of the Amish church began with a schism in Switzerland within a group of Swiss and Alsatian Anabaptists in 1693 led by Jakob Ammann. Those who followed Ammann became known as Amish. In the early 18th century, many Amish and Mennonites immigrated to Pennsylvania for a variety of reasons. Today, the most traditional descendants of the Amish continue to speak Pennsylvania German, also known as "Pennsylvania Dutch," although a dialect of Swiss German is used by Old Order Amish in the Adams County, Indiana area. As of 2000, over 165,000 Old Order Amish live in the United States and about 1,500 live in Canada. A 2008 study suggested their numbers have increased to 227,000, and in 2010 a study suggested their population had grown by 10 percent in the past two years to 249,000, with increasing movement to the West. Unlike most Americans who have had a birthrate too low to maintain the population since the early 1970s, most of the Amish continue to have 6–7 children while benefiting from the major decrease in infant and maternal mortality in the 20th century. Between 1992 and 2013, the Amish population increased by 120%, while the US population increased by only 23%)

In the Ugaritic Ba'al/Hadad cycle 'Anat is a violent war-goddess, a virgin (btl't 'nt) who is the sister and, according to a much disputed theory, the lover of the great god Ba'al Hadad. Ba'al is usually called the son of Dagan and sometimes the son of El, who addresses 'Anat as "daughter". Either relationship is probably figurative. Anat's titles used again and again are "virgin Anat" and "sister-in-law of the peoples" (or "progenitress of the peoples" or "sister-in-law, widow of the Li'mites"). In a fragmentary passage from Ugarit (modern Ras Shamra), Syria Anat appears as a fierce, wild and furious warrior in a battle, wading knee-deep in blood, striking off heads, cutting off hands, binding the heads to her torso and the hands in her sash, driving out the old men and townfolk with her arrows, her heart filled with joy. "Her character in this passage anticipates her subsequent warlike role against the enemies of Baal")

As civic and religious leaders, Archons were responsible for organizing theatrical performances during festivals through playwrights and choregai, wealthy citizen patrons. It is the masculine present participle of the verb stem ἀρχ-, meaning "to rule," derived from the same root as monarch. An archon, in the Gnosticism of late antiquity, was any of several servants of the Demiurge, the "creator god" that stood between the human race and a transcendent God that could only be reached through gnosis. In this context they have the role of the angels and demons of the Old Testament. They give their name to the sect called Archontics. The term was taken from the ancient Greek position of office "archon")

		(One who undergoes the systematic study of demons or beliefs about demons. It is the branch of theology relating to supernatural beings who are not gods. It deals both with benevolent beings that have no circle of worshippers or so limited a circle as to be below the rank of gods, and with malevolent beings of all kinds. The original sense of "demon", from the time of Homer onward, was a benevolent being, but in English the name now holds connotations of malevolence. (In order to keep the distinction, when referring to the word in its original Greek meaning English uses the spelling "Daemon" or "Daimon".) Demons, when regarded as spirits, may belong to either of the classes of spirits recognized by primitive animism; that is to say, they may be human, or non-human, separable souls, or discarnate spirits which have never inhabited a body. A sharp distinction is often drawn between these two classes, notably by the Melanesians, several African groups, and others; the Arab jinn, for example, are not reducible to modified human souls; at the same time these classes are frequently conceived as producing identical results, e.g. diseases)

According to Islamic eschatology, after death, one will reside in the grave until the appointed resurrection on Yawm al-Qiyamah. Muslims believe that the treatment of the individual in the life of the grave will be according to his or her deeds in the worldly life. Jannah is often compared to Christian concepts of Heaven. According to Muslim belief, everything one longs for in this world will be there in Paradise. Genesis	20	(Bereshit; The Book of Genesis (from the Latin Vulgate, in turn borrowed or transliterated from Greek meaning "origin"; "In [the] beginning") is the first book of the Hebrew Bible (the Tanakh) and the Christian Old Testament. The basic narrative expresses the central theme: God creates the world (along with creating the first man and woman) and appoints man as his regent, but man proves disobedient and God destroys his world through the Flood. The new post-Flood world is equally corrupt, but God does not destroy it, instead calling one man, Abraham, to be the seed of its salvation. At God's command Abraham descends from his home into the land of Canaan, given to him by God, where he dwells as a sojourner, as does his son Isaac and his grandson Jacob. Jacob's name is changed to Israel, and through the agency of his son Joseph, the children of Israel descend into Egypt, 70 people in all with their households, and God promises them a future of greatness. Genesis ends with Israel in Egypt, ready for the coming of Moses and the Exodus. The narrative is punctuated by a series of covenants with God, successively narrowing in scope from all mankind (the covenant with Noah) to a special relationship with one people alone (Abraham and his descendants through Isaac and Jacob). The book's author or authors appear to have structured it around ten "toledot" sections (the "these are the generations of..." phrases), but modern commentators see it in terms of a "primeval history" (chapters 1-11) followed by the cycle of Patriarchal stories (chapters 12-50). In Judaism, the theological importance of Genesis centers on the covenants linking God to his chosen people and the people to the Promised Land. Christianity has interpreted Genesis as the prefiguration of certain cardinal Christian beliefs, primarily the need for salvation (the hope or assurance of all Christians) and the redemptive act of Christ on the Cross as the fulfillment of covenant promises as the Son of God. Tradition credits Moses as the author of Genesis, as well as Exodus, Leviticus, Numbers and most of Deuteronomy, but modern scholars increasingly see them as a product of the 6th and 5th centuries BCE)

Hoder	20	(often anglicized as Hod or Hodur, or Hodr is a blind god and the brother of Baldr in Norse mythology. Tricked and guided by Loki, he shot the mistletoe arrow which was to slay the otherwise invulnerable Baldr. According to the Prose Edda and the Poetic Edda, the goddess Frigg, Baldr's mother, made everything in existence swear never to harm Baldr, except for the mistletoe, which she found too unimportant to ask (alternatively, which she found too young to demand an oath from). The gods amused themselves by trying weapons on Baldr and seeing them fail to do any harm. Loki, the mischief-maker, upon finding out about Baldr's one weakness, made a spear from mistletoe, and helped Hodr shoot it at Baldr. In reaction to this, Odin and the giantess Rindr gave birth to Váli, who grew to adulthood within a day and slew Hodr. The Danish historian Saxo Grammaticus recorded an alternative version of this myth in his Gesta Danorum. In this version, the mortal hero Hotherus and the demi-god Balderus compete for the hand of Nanna. Ultimately, Hotherus slays Balderus)

The society's goals were to oppose superstition, obscurantism, religious influence over public life and abuses of state power. "The order of the day," they wrote in their general statutes, "is to put an end to the machinations of the purveyors of injustice, to control them without dominating them." The Illuminati—along with Freemasonry and other secret societies—were outlawed through edict, by the Bavarian ruler, Charles Theodore, with the encouragement of the Roman Catholic Church, in 1784, 1785, 1787 and 1790. In the several years following, the group was vilified by conservative and religious critics who claimed that they continued underground and were responsible for the French Revolution. In subsequent use, "Illuminati" refers to various organisations which claim or are purported to have links to the original Bavarian Illuminati or similar secret societies, though these links are unsubstantiated. They are often alleged to conspire to control world affairs, by masterminding events and planting agents in government and corporations, in order to gain political power and influence and to establish a New World Order. Central to some of the most widely known and elaborate conspiracy theories, the Illuminati have been depicted as lurking in the shadows and pulling the strings and levers of power in dozens of novels, movies, television shows, comics, video games, and music videos)

		<p>(In Germanic mythology, Odin (from Old Norse Odinn) is a widely revered god. In Norse mythology, from which stems most of our information about the god, Odin is associated with healing, death, royalty, the gallows, knowledge, battle, sorcery, poetry, frenzy, and the runic alphabet, and is the husband of the goddess Frigg. In wider Germanic mythology and paganism, Odin was known in Old English as Woden, in Old Saxon as Wodan, and in Old High German as Wuotan or Wotan, all stemming from the reconstructed Proto-Germanic theonym wodanaz. Odin is a prominently mentioned god throughout the recorded history of the Germanic peoples, from the Roman occupation of regions of Germania through the tribal expansions of the Migration Period and the Viking Age. Odin continued into the modern period to be acknowledged in rural folklore in all Germanic regions. References to Odin appear in place names throughout regions historically inhabited by the ancient Germanic peoples, and the day of the week Wednesday bears his name in many Germanic languages, including English. In Anglo-Saxon England, Odin held a particular place as a euhemerized ancestral figure among royalty, and he is frequently referred to as a founding figure among various other Germanic peoples, including the Langobards and in most of Scandinavia. Forms of his name appear frequently throughout the Germanic record, though narratives regarding Odin are primarily found in Old Norse works recorded in Iceland, primarily around the 13th century, texts which make up the bulk of modern understanding of Norse mythology. In Old Norse texts, Odin is depicted as one-eyed and long-bearded, frequently wielding a spear named Gungnir, and wearing a cloak and a broad hat. He is often accompanied by his animal companions -- the wolves Geri and Freki and the ravens Huginn and Muninn, who bring him information from all over Midgard -- and Odin rides the flying, eight-legged steed Sleipnir across the sky and into the underworld. Odin is attested as having many sons, most famously the god Baldr with Frigg, and is known by hundreds of names. In these texts, Odin frequently seeks knowledge in some manner and in disguise (most famously by obtaining the Mead of Poetry), at times makes wagers with his wife Frigg over the outcome of exploits, and takes part in both the creation of the world by way of slaying the primordial being Ymir and the gift of life to the first two humans Ask and Embla. Odin has a particular association with Yule, and mankind's knowledge of both the runes and poetry is also attributed to Odin)</p>

She is the symbol of the chaos of primordial creation, depicted as a woman, she represents the beauty of the feminine, depicted as the glistening one. It is suggested that there are two parts to the Tiamat mythos, the first in which Tiamat is a creator goddess, through a "Sacred marriage" between salt and fresh water, peacefully creating the cosmos through successive generations. In the second "Chaoskampf" Tiamat is considered the monstrous embodiment of primordial chaos. Some sources identify her with images of a sea serpent or dragon)

		(Tsade or Sade (also spelled Saddi, Sad, Tzadi, Sadhe, Tzaddik) is the eighteenth letter of the Semitic abjads. It represents the coalescence of three Proto-Semitic "emphatic consonants" in Canaanite. Arabic, which kept the phonemes separate, introduced variants of sad and ta to express the three (see: dad za). In Aramaic, these emphatic consonants coalesced instead with ayin and tet, respectively, thus Hebrew eres (earth) is ara in Aramaic. The Phoenician letter is continued in the Greek San and possibly Sampi, and in Etruscan. It may have inspired the form of the letter Tse in the Glagolitic and Cyrillic alphabet. The corresponding letter of the Ugaritic alphabet is sade. The letter is known as "tsadik" in Yiddish, and Hebrew speakers often give it that name as well. This name for the letter probably originated from a fast recitation of the alphabet (i.e., "tsadi, qoph" -> "tsadiq, qoph"), influenced by the Hebrew word tzadik, meaning 'righteous person')

		<p>(or Dagan (Ugaritic: Dgn, Dagnu, or Daganu; Akkadian: Dagana) was originally an East Semitic Mesopotamian (Akkadian, Assyrian, Babylonian) fertility god who evolved into a major Northwest Semitic god, reportedly of grain (as symbol of fertility) and fish and/or fishing (as symbol of multiplying). He was worshipped by the early Amorites and by the inhabitants of the cities of Ebla (modern Tell Mardikh, Syria) and Ugarit (modern Ras Shamra, Syria). He was also a major member, or perhaps head, of the pantheon of the Philistines. "Dagon" is a short story by H. P. Lovecraft, written in July 1917, one of the first stories he wrote as an adult. It was first published in the November 1919 edition of The Vagrant issue #11. The story is the testament of a tortured, morphine-addicted man who plans to commit suicide over an incident that occurred early on in World War I when he was a merchant marine officer. In the unnamed narrator's account, his cargo ship is captured by a German sea-raider in "one of the most open and least frequented parts of the broad Pacific". He escapes on a lifeboat and drifts aimlessly across the sea "somewhat south of the equator" until he eventually finds himself inexplicably stranded on "a slimy expanse of hellish black mire which extended about me in monotonous undulations as far as I could see.... The region was putrid with the carcasses of decaying fish, and of other less describable things which I saw protruding from the nasty mud of the unending plain." He theorizes that this area was formerly "a portion of the ocean floor..." thrown to the surface by a volcanic upheaval, "exposing regions which for innumerable millions of years had lain hidden under unfathomable watery depths." After waiting three days for the seafloor to dry out sufficiently to walk on, he strikes out on foot to find the sea and possible rescue. After two days of walking, he reaches his goal, a hummock that turns out to be a mound on the edge of an "immeasurable pit or canyon". Descending the slope, he sees a gigantic white stone object that he soon perceives to be a "well-shaped monolith whose massive bulk had known the workmanship and perhaps the worship of living and thinking creatures." The monolith, situated next to a channel of water in the bottom of the chasm, is covered in unfamiliar hieroglyphs "consisting for the most part of conventionalised aquatic symbols such as fishes, eels, octopuses, crustaceans, molluscs, whales and the like." There are also "crude sculptures" depicting: men--at least, a certain sort of men; though the creatures were shown disporting like fishes in the waters of some marine grotto, or paying homage at some monolithic shrine which appeared to be under the waves as well... [T]hey were damnably human in general outline despite webbed hands and feet, shockingly wide and flabby lips, glassy, bulging eyes, and other features less pleasant to recall. Curiously enough, they seemed to have been chiseled badly out of proportion with their scenic background; for one of the creatures was shown in the act of killing a whale represented as but little larger than himself. As the narrator looks on the monolith, a creature emerges from the water: With only a slight churning to mark its rise to the surface, the thing slid into view above the dark waters. Vast, Polyphemus-like, and loathsome, it darted like a stupendous monster of nightmares to the monolith, about which it flung its gigantic scaly arms, the while it bowed its hideous head and gave vent to certain measured sounds. Insane with fear, the mariner flees back to his stranded boat, and vaguely recalls a "great storm". His next memory is of a San Francisco hospital, where he was taken after being rescued in mid-ocean by a U.S. ship. There are no reports of any Pacific upheavals, and he does not expect anyone to believe his incredible story. He mentions one abortive attempt to gain understanding of his experience: Once I sought out a celebrated ethnologist, and amused him with peculiar questions regarding the ancient Philistine legend of Dagon, the Fish-God; but soon perceiving that he was hopelessly conventional, I did not press my inquiries.</p>

Geomancy	29	(a method of divination that interprets markings on the ground or the patterns formed by tossed handfuls of soil, rocks, or sand. The most prevalent form of divinatory geomancy involves interpreting a series of 16 figures formed by a randomized process that involves recursion followed by analyzing them, often augmented with astrological interpretations. Once practiced by people from all social classes, it was one of the most popular forms of divination throughout Africa and Europe in the Middle Ages and the Renaissance. Books and treatises on geomancy were published up until the 17th century when most occult traditions fell out of popularity. In Renaissance magic, geomancy was classified as one of the seven "forbidden arts", along with necromancy, hydromancy, aeromancy, pyromancy, chiromancy (palmistry), and spatulamancy (scapulimancy). Geomancy is dismissed by the scientific community and skeptics as being superstition)

Ghazal	29	(a poetic form consisting of rhyming couplets and a refrain, with each line sharing the same meter. A ghazal may be understood as a poetic expression of both the pain of loss or separation and the beauty of love in spite of that pain. The form is ancient, originating in Arabic poetry in Arabia long before the birth of Islam. The term ghazal is of North African and Middle Eastern origin. Its root term in Arabic is " gh-zl " and is derived from the Arabian panegyric qasida. The structural requirements of the ghazal are similar in stringency to those of the Petrarchan sonnet. In style and content it is a genre that has proved capable of an extraordinary variety of expression around its central themes of love and separation)

		("battle swine" is Freyja's boar In Norse mythology. The story of Hildisvini appears in Hyndluljod, an Old Norse poem found in Flateyjarbok but often considered a part of the Poetic Edda. In the poem, Freyja is searching for the ancestry of her protege, Ottar. Freyja rides on her boar Hildisvini, who is in fact Ottar in disguise. They meet Hyndla who is a seeress. Freyja succeeds in forcing Hyndla to tell Ottar about his ancestors. Snorri Sturluson also records that among boar-names for helmets was Hildisvini, the helmet of Ali. This helmet was among the things that were taken by the Swedish king Adils after his victory at the Battle on the Ice of Lake Vanern)

		(also called witchery or spellcraft, broadly means the practice of, and belief in, magical skills and abilities that are able to be exercised individually by designated social groups, or by persons with the necessary esoteric secret knowledge. Witchcraft is a complex concept that varies culturally and societally; therefore, it is difficult to define with precision and cross-cultural assumptions about the meaning or significance of the term should be applied with caution. Witchcraft often occupies a religious, divinatory or medicinal role, and is often present within societies and groups whose cultural framework includes a magical world view. Although witchcraft can often share common ground with related concepts such as sorcery, the paranormal, magical, superstition, necromancy, possession, shamanism, healing, spiritualism, nature worship and the occult, it is usually seen as distinct from these when examined by sociologists and anthropologists)

		(or Asceticism (from the Greek: "exercise" or "training") is a lifestyle characterized by abstinence from worldly pleasures, often for the purpose of pursuing spiritual goals. Ascetics may withdraw from the world for their practices or continue to be part of their society, but typically adopt a frugal lifestyle, characterised by the renunciation of material possessions and physical pleasures, and time spent fasting while concentrating on the practice of religion or reflection upon spiritual matters. Asceticism has been historically observed in many religious traditions, including Christianity, Islam, Hinduism, Buddhism, and Jainism. The practitioners of these religions eschewed worldly pleasures and led an abstinent lifestyle, in the pursuit of redemption or spirituality)

		(The Queen Cassiopeia, wife of king Cepheus of Aethiopia, was beautiful but also arrogant and vain; these latter two characteristics led to her downfall. In some sources she was the daughter of Coronus and Zeuxo. Her name in Greek is Kassiope; other variants of the name in Greek are Kassiopeia and Kassiepeia. The boast of Cassiopeia was that both she and her daughter Andromeda were more beautiful than all the Nereids, the nymph-daughters of the sea god Nereus. This brought the wrath of Poseidon, ruling god of the sea, upon the kingdom of Ethiopia. Accounts differ as to whether Poseidon decided to flood the whole country or direct the sea monster Cetus to destroy it. In either case, trying to save their kingdom, Cepheus and Cassiopeia consulted a wise oracle, who told them that the only way to appease the sea gods was to sacrifice their daughter)

		(or, more correctly, a square and a set of compasses joined together is the single most identifiable symbol of Freemasonry. Both the square and compasses are architect's tools and are used in Masonic ritual as emblems to teach symbolic lessons. Some Lodges and rituals explain these symbols as lessons in conduct: for example, Duncan's Masonic Monitor of 1866 explains them as: "The square, to square our actions; The compasses, to circumscribe and keep us within bounds with all mankind". However, as Freemasonry is non-dogmatic, there is no general interpretation for these symbols (or any Masonic symbol) that is used by Freemasonry as a whole. In English speaking jurisdictions the Square and Compasses are often depicted with the letter "G" in the center. The letter is interpreted to represent different words jurisdiction to jurisdiction. Among the most widely accepted interpretations are that: [G] stands for God, and is to remind Masons that God is at the center of Freemasonry. In this context it can also stand for Great Architect of the Universe (a reference to God). In a different context, the letter stands for Geometry, described as being the "noblest of sciences", and "the basis upon which the superstructure of Freemasonry is erected")

In Valhalla, the einherjar eat their fill of the nightly-resurrecting beast Sæhrimnir, and are brought their fill of mead (from the udder of the goat Heidrun) by valkyries. The einherjar prepare daily for the events of Ragnarok, when they will advance for an immense battle at the field of Vigridr; the battle which the "ein" (here meaning single-time) refers to. Similar systems, some of which were derived from or inspired by Hebrew gematria, have been used in other languages and cultures. The best-known example of Hebrew gematria is the word Chai ("alive"), which is composed of two letters that (using the assignments in the Mispar gadol table shown below) add up to 18. This has made 18 a "lucky number" among Jews, and gifts in multiples of 18 are very popular)

Cannabis can be used by smoking, vaporization, within food, or as an extract. Cannabis is often used for its mental and physical effects, such as a "high" or "stoned" feeling, a general change in perception, euphoria (heightened mood), and an increase in appetite. Short term side effects may include a decrease in short-term memory, dry mouth, impaired motor skills, red eyes, and feelings of paranoia or anxiety. Long term side effects may include addiction, decreased mental ability in those who started as teenagers, and behavioral problems in children whose mothers used cannabis during pregnancy. Onset of effects is within minutes when smoked and about 30 to 60 minutes when cooked and eaten. They last for between two and six hours)

		(The Neither Neither Principle is essentially neutralizing energetic phenomena in your energy bodies by affirming their existence, affirming the opposite of their existence, then denying both. This is difficult because as you mention the myriad energetic phenomena, you must feel them in their entirety. "I am manic, I am Depressed, I am neither manic nor depressed." So you must "feel" the energies responsible for mania, then "feel" the energies responsible for depression, the feel them both simultaneously and use them to neutralize each other. It's wise to start with a list of traits to neutralize. The bigger they are, the better (and harder) they are to neutralize)

Sushumna "very gracious", "kind") runs along the spinal cord in the center, through the seven chakras. Under the correct conditions the energy of kundalini is said to uncoil and enter sushumna through the brahma dwara or gate of Brahma at the base of the spine. "The Green Man" is also a popular name for English public houses and various interpretations of the name appear on inn signs, which sometimes show a full figure rather than just the head. The Green Man motif has many variations. Found in many cultures from many ages around the world, the Green Man is often related to natural vegetative deities. It is primarily interpreted as a symbol of rebirth, representing the cycle of growth each spring. Some speculate that the mythology of the Green Man developed independently in the traditions of separate ancient cultures and evolved into the wide variety of examples found throughout history)

		(Heroin is an opioid pain killer. It is also used less commonly as a cough suppressant and as an anti-diarrheal. Heroin is used as a recreational drug for its euphoric effects. Frequent and regular administration is associated with tolerance and physical dependence. In some countries it is available for prescription to long-term users as a form of opioid replacement therapy alongside counseling. Administered intravenously by injection, heroin is two to four times more potent than morphine and is faster in its onset of action. Illicit heroin is sometimes available in a matte-white powder freebase form. Because of its lower boiling point, the freebase form of heroin is smokable. It is the 3,6-diacetyl ester of morphine. Heroin was first made by C. R. Alder Wright in 1874 by adding two acetyl groups to the molecule morphine, a natural product of the opium poppy. Internationally, heroin is controlled under Schedules I and IV of the Single Convention on Narcotic Drugs. It is generally illegal to manufacture, possess, or sell heroin without a license. In 2004 Afghanistan produced roughly 87% of the world supply in illicit raw opium. However, the production rate in Mexico rose sixfold from 2007 to 2011, making Mexico the second-largest opium producer in the world)

He married Laura Welch in 1977 and ran unsuccessfully for the House of Representatives shortly thereafter. He later co-owned the Texas Rangers baseball team before defeating Ann Richards in the 1994 Texas gubernatorial election. He was elected president in 2000 after a close and controversial election against Al Gore, becoming the fourth president to be elected while receiving fewer popular votes nationwide than an opponent. He is the second president to have been the son of a former president, the first having been John Quincy Adams. He is also the brother of Jeb Bush, a former Governor of Florida and former candidate for the Republican presidential nomination in the 2016 presidential election. Eight months into Bush's first term as president, the September 11 terrorist attacks occurred. Bush responded with what became known as the Bush Doctrine: launching a "War on Terror", an international military campaign which included the war in Afghanistan, in 2001, and the Iraq War, in 2003. He also promoted policies on the economy, health care, education, social security reform, and amending the Constitution to prohibit same-sex marriage. He signed into law broad tax cuts, the Patriot Act, the No Child Left Behind Act, the Partial-Birth Abortion Ban Act, Medicare prescription drug benefits for seniors, and funding for the AIDS relief program known as PEPFAR. His tenure saw national debates on immigration, Social Security, electronic surveillance, and torture)

Merkaba	47	<p>(Merkabah/Merkavah mysticism (or Chariot mysticism) is a school of early Jewish mysticism, circa 100 BCE – 1000 CE, centered on visions such as those found in the Book of Ezekiel chapter 1, or in the hekhalot ("palaces") literature, concerning stories of ascents to the heavenly palaces and the Throne of God. The main corpus of the Merkabah literature was composed in Israel in the period 200–700 CE, although later references to the Chariot tradition can also be found in the literature of the Chassidei Ashkenaz in the Middle Ages. A major text in this tradition is the Maaseh Merkabah (Works of the Chariot). The noun merkabah "thing to ride in, cart" is derived from the consonantal root r-k-b with the general meaning "to ride". The word "chariot" is found 44 times in the Masoretic text of the Hebrew Bible – most of them referring to normal chariots on earth, and although the concept of the Merkabah is associated with Ezekiel's vision (1:4-26), the word is not explicitly written in Ezekiel 1. However, when left untranslated, in English the Hebrew term merkabah relates to the throne-chariot of God in prophetic visions. It is most closely associated with the vision in Ezekiel chapter 1 of the four-wheeled vehicle driven by four hayyot ("living creatures"), each of which has four wings and the four faces of a man, lion, ox, and eagle or vulture)</p>

Michael	47	<p>(Saint Michael the Archangel or Micha'el is an archangel in Judaism, Christianity, and Islam. Roman Catholics, the Eastern Orthodox, Anglicans, and Lutherans refer to him as "Saint Michael the Archangel" and also as "Saint Michael". Oriental and Eastern Orthodox Christians refer to him as the "Taxiarch Archangel Michael" or simply "Archangel Michael". Michael is mentioned three times in the Book of Daniel, once as a "great prince who stands up for the children of your people". The idea that Michael was the advocate of the Jews became so prevalent; that in spite of the rabbinical prohibition against appealing to angels as intermediaries between God and his people, Michael came to occupy a certain place in the Jewish liturgy. In the New Testament Michael leads God's armies against Satan's forces in the Book of Revelation, where during the war in heaven he defeats Satan. In the Epistle of Jude Michael is specifically referred to as "the archangel Michael". Christian sanctuaries to Michael appeared in the 4th century, when he was first seen as a healing angel, and then over time as a protector and the leader of the army of God against the forces of evil. By the 6th century, devotions to Archangel Michael were widespread both in the Eastern and Western Churches. Over time, teachings on Michael began to vary among Christian denominations)</p>

Naked Lunch	47	<p>(sometimes The Naked Lunch is a novel by American writer William S. Burroughs, originally published in 1959. The book is structured as a series of loosely connected vignettes. Burroughs stated that the chapters are intended to be read in any order. The reader follows the narration of junkie William Lee, who takes on various aliases, from the US to Mexico, eventually to Tangier and the dreamlike Interzone. The vignettes (which Burroughs called "routines") are drawn from Burroughs' own experience in these places, and his addiction to drugs (heroin, morphine, and while in Tangier, majoun (a strong marijuana confection) as well as a German opioid, brand name Eukodol, of which he wrote frequently). The novel was included in Time magazine's "100 Best English-language Novels from 1923 to 2005". In 1991, David Cronenberg released a film of the same name based upon the novel and other Burroughs writings)</p>

Neanderthals	47	(named after the Valley of the Neander River area in Germany, were a species or subspecies of human in the genus Homo which became extinct between 40,000 and 28,000 years ago. They were closely related to modern humans, having DNA over 99.5% the same. Remains left by Neanderthals include bone and stone tools, which are found in Eurasia, from Western Europe to Central, Northern, and Western Asia. Neanderthals are generally classified by paleontologists as the species Homo neanderthalensis, having separated from the Homo sapiens lineage 600,000 years ago, or alternatively as a subspecies of Homo sapiens (Homo sapiens neanderthalensis). Several cultural assemblages have been linked to the Neanderthals in Europe. The earliest, the Mousterian stone tool culture, dates to about 300,000 years ago. Late Mousterian artifacts were found in Gorham's Cave on the south-facing coast of Gibraltar)

Mahakali is the form of the Goddess Durga (Parvati) beyond time, Kali, who is the force of the anger of Durga and is an aspect of Durga or Adi parashakti, and therefore her color is black. Israel Regardie was a friend and student of Crowley's, and served as his personal secretary for some time. In this book, Regardie manages to write a fair and balanced view of Crowley. It is an intelligent and insightful look into Crowley's life, Magick and Mysticism. Dr. Regardie interprets all this from the wisdom of experience. A member of the Golden Dawn, O.T.O. and A. A., Regardie writes with deep insight and compassion, openly revealing his own feelings, and thus providing a unique insight into Crowley. This book is the classic biography of Crowley)

Indigo children	65	(according to a pseudoscientific New Age concept, are children who are believed to possess special, unusual, and sometimes supernatural traits or abilities. They are sometimes also referred to as crystal children or star children. The idea is based on concepts developed in the 1970s by Nancy Ann Tappe and further developed by Jan Tober and Lee Carroll. The concept of indigo children gained popular interest with the publication of a series of books in the late 1990s and the release of several films in the following decade. A variety of books, conferences and related materials have been created surrounding belief in the idea of indigo children and their nature and abilities. The interpretations of these beliefs range from their being the next stage in human evolution, in some cases possessing paranormal abilities such as telepathy, to the belief that they are more empathetic and creative than their peers)

Lady Babalon	65	(also known as the Scarlet Woman, Great Mother or Mother of Abominations is a goddess found in the mystical system of Thelema, which was established in 1904 with English author and occultist Aleister Crowley's writing of The Book of the Law, her name being later given in other works. In her most abstract form, she represents the female sexual impulse and the liberated woman. In the creed of the Gnostic Mass she is also identified with Mother Earth, in her most fertile sense. At the same time, Crowley believed that Babalon had an earthly aspect in the form of a spiritual office, which could be filled by actual women -- usually as a counterpart to his own identification as "To Mega Therion" (The Great Beast) -- whose duty was then to help manifest the energies of the current Aeon of Horus. Her consort is Chaos, the "Father of Life" and the male form of the Creative Principle. Babalon is often described as being girt with a sword and riding the Beast. She is often referred to as a sacred whore, and her primary symbol is the Chalice or Graal. As Crowley wrote in his The Book of Thoth, "she rides astride the Beast; in her left hand she holds the reins, representing the passion which unites them. In her right she holds aloft the cup, the Holy Grail aflame with love and death. In this cup are mingled the elements of the sacrament of the Aeon") = Left hand of God (Gabriel is interpreted by the Rabbanim to be the "man in linen" in the Book of Daniel and the Book of Ezekiel. In the Book of Daniel, he is responsible for interpreting Daniel's visions. Gabriel's main function in Daniel is that of revealer, a role he continues in later literature. In the Book of Ezekiel, Gabriel is understood to be the angel that was sent to destroy Jerusalem. According to the Jewish Encyclopedia, Gabriel takes the form of a man, and stands at the left hand of God)

the Big Bang	65	(The Big Bang theory is the prevailing cosmological model for the universe from the earliest known periods through its subsequent large-scale evolution. The model accounts for the fact that the universe expanded from a very high density and high temperature state, and offers a comprehensive explanation for a broad range of phenomena, including the abundance of light elements, the cosmic microwave background, large scale structure and Hubble's Law. If the known laws of physics are extrapolated beyond where they have been verified, there is a singularity. Some estimates place this moment at approximately 13.8 billion years ago, which is thus considered the age of the universe. After the initial expansion, the universe cooled sufficiently to allow the formation of subatomic particles, and later simple atoms. The antiquarian spelling "Qabalah" is more common in this context, but the modern spelling "Kabbalah" is also found. According to Jake Stratton-Kent, the English Qabala is a qabalah and not a system of numerology or solely gematria. He believes a qabalah is specifically related to three factors: a language, a 'holy' text or texts, and mathematical laws at work in these two. Gematria, on the other hand, is a system in which letters are equated to number values. The letters comprising the word or name of person or object are then summed together. The number of this sum is termed the key of that particular word. Words sharing the same key are said to share properties. The letters are often tabulated along with their numerical equivalents)

Kalacakra refers both to a patron Tantric deity or istadevata, (Wylie: yi dam) of Vajrayana Buddhism and to the philosophies and meditation practices contained within the Kalacakra Tantra and its many commentaries. The Kalacakra Tantra is more properly called the Kalacakra Laghutantra, and is said to be an abridged form of an original text, the Kalacakra Mulatantra which is no longer extant. Some Buddhist masters assert that Kalacakra is the most advanced form of Vajrayana practice; it certainly is one of the most complex systems within tantric Buddhism. The Kalacakra tradition revolves around the concept of time (kala) and cycles (chakra): from the cycles of the planets, to the cycles of human breathing, it teaches the practice of working with the most subtle energies within one's body on the path to enlightenment)

		(Gautama Buddha, also known as Shakyamuni Buddha, or simply the Buddha, was an ascetic (sramana) and sage, on whose teachings Buddhism was founded. He is believed to have lived and taught mostly in the eastern part of the Indian subcontinent sometime between the sixth and fourth centuries BCE. Gautama taught a Middle Way between sensual indulgence and the severe asceticism found in the sramana movement common in his region. He later taught throughout other regions of eastern India such as Magadha and Kosala. Gautama is the primary figure in Buddhism. He is recognized by Buddhists as an enlightened or divine teacher who attained full Buddhahood, and shared his insights to help sentient beings end rebirth and suffering. Accounts of his life, discourses, and monastic rules are believed by Buddhists to have been summarized after his death and memorized by his followers. Various collections of teachings attributed to him were passed down by oral tradition and first committed to writing about 400 years later)
